

OBJECTIVE

Motivated Full Stack MERN Developer with strong knowledge of JavaScript, React, Node.js, Express, and MongoDB. Skilled in building responsive web applications, implementing REST APIs, and solving real-world problems. Seeking an entry-level developer role to contribute to impactful projects while continuously learning and growing as a software professional.

TECHNICAL SKILLS

Languages	: JavaScript, HTML, CSS
Frameworks	: React.js, Express, Node.js
Libraries	: Bootstrap, Tailwind CSS, Redux, React Router
Databases	: MongoDB
Dev Tools	: Visual Studio Code, Git, Render, Netlify, Postman

CERTIFICATIONS

- Frontend Developer – **NayayNow May 2025 – Sep 2025**
- Experience Certificate – **NayayNow 2025**
- Full Stack Developer Certificate – **GUVI (IIT) 2025**

PROJECTS

ECommerce	<i>React.js, Nodejs, Express, MongoDB</i>	Site Link
• Designed and developed a clean and modern website using Reactjs, Node and MongoDB • Site developed like real time online shopping user experience with Authentication • Optimized website for speed and user experience • Utilized responsive design to ensure compatibility across all devices • For order confirmation i used AI Integration for confirmation message successful notification. • Deployed on GitHub pages via GitHub Actions		
AI Lawyer	<i>React.js, Nodejs, Express, MongoDB</i>	Site Link
• Developed an AI-powered web platform enabling users to upload legal PDF documents and receive context-aware legal assistance through an interactive chat interface. • Implemented PDF ingestion and text extraction, allowing users to ask legal queries specifically related to the uploaded documents. • Integrated AI-driven conversational system to answer legal doubts, improving user understanding of legal content and processes. • Built a police complaint filing module, allowing users to digitally submit complaints through a structured workflow. • Designed and implemented dynamic legal document generation, enabling users to fill forms and download legally formatted documents.		
Blogs	<i>React.js, Nodejs, Express, MongoDB</i>	Site Link
• A CRUD application exposed using a RESTful API made with Node.js • Developed a secure blog platform where authenticated users can create, read, update, and delete their own blog posts while accessing read-only content from other users. • Implemented role-based authorization and access control, ensuring users can modify only their own data and view content from authorized users.		

- Designed a **responsive and user-friendly UI**, ensuring seamless experience across mobile, tablet, and desktop devices.
- Integrated **authentication and session management** to restrict blog access to authorized users only.

Netflix

React.js, Redux, Nodejs, Express, MongoDB

[Site Link](#)

- Developed a **Netflix-inspired streaming platform** with a highly responsive and visually accurate UI, closely matching real-world product design standards.
- Implemented **user authentication and protected routes** to provide personalized and secure user experiences.
- Integrated **RESTful APIs and MongoDB** for backend data management, user data storage, and application scalability.
- Utilized **animation and carousel libraries** to enhance user engagement and deliver smooth, interactive UI transitions.
- Designed a **mobile-first, responsive interface** ensuring consistent user experience across devices.

EXPERIENCE

NayayNow

Feb 2022 – Oct 2025

Fullstack Developer

- Developed an **AI-powered web platform** enabling users to upload legal PDF documents and receive **context-aware legal assistance** through an interactive chat interface.
- Implemented **PDF ingestion and text extraction**, allowing users to ask legal queries specifically related to the uploaded documents.
- Integrated **AI-driven conversational system** to answer legal doubts, improving user understanding of legal content and processes.

Toppan Merrill

Aug 2021 – Nov 2022
