CERTIFICATIONS

Frontend Developer (NayayNow)	May 2025 - Sep 2025
Experience Certificate (NayayNow)	2025
Fullstack Developer Certificate	GUVI-IIT 2025

PROJECTS

NayayNow (AI Lawyer) [Link to Demo](#)

- No legal knowledge needed .
- Our platform connects you instantly with verified, experienced advocates—backed by AI tools to make legal support faster, clearer, and more accessible.
- AI-Powered Drafting & Summaries that save time .
- Real Advocate Consultations when human expertise is essential
- Understand Your Legal Documents in plain language
- Business, Work, Rent, Property. Personal, Any Documents and Legal Doubts.

Netflix [Link to Demo](#)

Tech Stack: React.js, Bootstrap, Node.js, Express.js, MongoDB

- Developed a responsive Netflix-style streaming UI using React.js and Bootstrap, ensuring smooth user experience across all devices.
- Implemented secure user authentication (register/login) with encrypted passwords and session/token-based access control.
- Built backend APIs using Node.js and Express.js for managing users and content data.
- Integrated MongoDB for database management, including user data handling and content retrieval.
- Added animations and UI transitions using external libraries to enhance look and feel.
- Designed modular, reusable components for better code maintainability and scalability.

Mern Blogs

[Link to Demo](#)

Tech Stack: React.js, Bootstrap, Node.js, Express.js, MongoDB

- Built a dynamic blogging platform where users can browse and read all public blogs without login.
- Implemented secure user authentication to ensure only registered users can create, edit, update, or delete their own blog posts (full CRUD).
- Designed a clean, responsive UI for smooth reading and posting experiences across devices.
- Developed RESTful APIs using Node.js and Express.js for blog management and user operations.
- Integrated MongoDB for efficient handling of user data, blog posts, and real-time updates.

Capstone

[Link to Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Authentication

- Developed an interactive web application that suggests daily outfit color combinations using randomly generated images.
- Implemented secure user authentication to ensure only registered users can access the home page and use the recommendation feature.
- Designed a simple and responsive UI where users can click a button to instantly generate a new outfit color suggestion with an example image.
- Built backend services using Node.js and Express.js and managed user data with MongoDB.
- Ensured smooth performance with modular components, clean API structure, and optimized rendering for a seamless user experience.

WORK EXPERIENCE
